

Rapid **150 PowerTech**

Rapid 150 PowerTech line – For the toughest jobs.

The PowerTech line is specifically developed for filled and abrasive materials. It is optimized for long lasting wear resistance and top quality regrind. No compromises! The following headlines are some highlights of the PowerTech concept:

CleanGRIND Cutting technique

There are no short-cuts to the perfect regrind.

- Rapid has virtually perfected the art of processing high quality regrind. Consistent sized regrind with fewer fines that melts more uniformly. Recover your sprues without your production process and you'll feel the impact on the bottom line.

VersaGRIND Technology

- Specify the ideal granulator solution for your type and volume of plastic waste, granule size and recycling requirements. No compromises! Mix and match from Rapid's array of standardised options to create the granulator that exactly fits your application needs.

Easy CLEAN Engineering

- Easy cleaning and easy maintenance is fundamental demands for Rapid 150-Series. Instant access to all components provides easy cleaning when changing e.g. material or colours.

Cassette knife system

- The PowerTech-line is equipped with PowerTech knives with up to 13 times longer life-time.
- No re-sharpening! No re-adjustments! Just remove the worn knives and replace them with new ones. The knife clearance between rotating- and stator knife will automatically be correct!
- Make sure that you easily and quickly can service your granulator for long lasting durability and top quality regrind.

Standard hopper

	150-21	150-35	150-42
A	490	630	700
B	270	340	375
C	500	640	710

Hopper standard, base high-built

	150-21	150-35	150-42
A	490	630	700
B	270	340	375
C	500	640	710

Hopper Z-feed, base low-built

	150-21	150-35	150-42
A	490	530	700
B	270	340	375
